FL-986 wireless speakers

Unleashed Sound

Listening to and enjoying music is one of the many topics that Hama approaches with practical, problem-solving products. The new FL-986 stereo wireless speakers, for example, are perfect for anyone who doesn't want to sit in their living room in front of their stereo system, but rather wants to take their sound with them in the bath, the kitchen or on the balcony. The set consists of a transmitter that is connected to the stereo system or television, and two speakers that make it possible for you to enjoy your music in other rooms, as well as outside. You can use either the included power supply unit or six AA batteries per speaker to power the system, which means you don't have to worry about power outlets that are hard to reach or too far away. The speakers can be positioned vertically or horizontally and can also be mounted on the wall. You can control the volume easily with the system remote control as well as directly on the speakers. PLL technology provides automatic frequency adjusting and ensures that signal transmission is stable.

Specifications

Output: 2 x 4 Watt (RMS)
Harmonic distortion: < 1.5%
Frequency range: 40 Hz - 12 kHz
Transmission frequency: 863 MHz
Max. range: 100 m
Height: 25 cm, Diameter: 13 cm

Item No. 40986; FL-986 wireless speakers
